Mines and Prospects--Furnaces and Mills

Big Ore Bodies in Pittsburg Mine

Recent Discovery in Alta Group Opens Up Into One of Most Interesting of the Season.

Late advices from the recent strike or the property of the Pittsburg Mining company, overlooking Alia, indicate its development as one of the most imper-ant in the annals of that locality. In the lower tunnel, where the ore body was encountered on the contact between the opened up for forty-six feet on its strike while a crosscut has been put into it for hearly seventeen feet, with but one wall now exposed. Geourring in this powerful ore bedy is a massive galens, the metallic contents of which will exceed perhaps 90 per cent lead, with characteristic values in after and gold, while the entire mass will perhaps afford an average of 25 per cent lead or better. From the north drift or the firsure some very finelized of the being seaked and a scipment is likely at any time. This channed is directly under what is known as the process ore body and that was productive at an earlier period of one that averaged shout 29 per cent lead—not a little of it running even higher. The one now being sacked will maintain this average according to those who have seen it, if it does not exceed it. Manager J. E. Hill. Jr., and S. M. Levy, who is serving the company in an advisory way, are to be congratulated upon the splendid results that are being achieved by them, while the samp generally is to be folicitated upon a disclosure that cannot but emphasize much that has been claimed for while a crosscut has been put into it for

ores.

In the same locality are a number of most likely prospects upon which work will no doubt be continued the present senson and there is everything to fore tell other strikes up there as the campaign of development advances.

RICH TWO-FOOT VEIN

Found on Lone Star Group of Gold Claims on Virgin River.

Special to The Tribune.

CALIENTE, Nev., Oct. 28 - Myroc Fisher and Joe Bullard, owners of th Lone Star group of gold claims on Virgin river, three miles from Rock canyon, struck a rich two-foot vein of freemilling quartz last week, and are now
drifting on the sume from the breast of
a seventy-foot tunnel run to cut a six-foot
ledge which crops out for over 300 feet.
The tunnel will be continued 350 feet to
cut this ledge. Assays from the new
strike show values of 856.20 per ton.

Wert McNames ball course of the Ukra-

Wert McNames, half-owner of the Eliza Jane silver claim in Chief district, north-west from Callente, has just received assay returns from samples sent to Salt Lake hast week of 210 ounces per ton in silver. The values run in lime and spar, pockets, and carry blackjack in a four-foot veln. A tunnel is run on the ledge and several open cuts show continuity of ledge for 600 feet.

Merten Thompson and Jack Bullard, owners and locators of the Twin Peaks group of gold-silver claims north of Meapa, sold their properties, seven in number, last week to Goodwin & Burbanks of San Diego for \$30,00, one-half in sixty days and the balance in one year from October 25, 193. They have over 50 feet of work completed in open cuits, shafts and tunnels, showing a ledge avernging five feet in width going from \$5.70 to \$50 in gold and from \$6 to 20 ounces sliver per ton. They have ever 700 tons of this ore blocked out, ready for extraction.

I. W. Moore and Neison Gillespie, loca-

J. W. Moore and Neisan Gillespie, loca-tors of the Red Light group of silver-lead claims, north of Calicate, brought in two sacks of ore for shipment to Sait Lake for assay. The lead is a rich car-Lake for alsay. The lead is a rich carbonate and the silver runs in a bromide and blackjack, in a four-foot ledge. The contact is lime and porphyry and nearly 100 tons are now on the dumps. About 1000 feet of tunnel and shaft work has been completed and the ledge crosscut at the 100, 200 and 300-foot levels.

WEALTH OF GOLDFIELD.

A Coloradoan Who Examined Its Mines With Mr. Kirby.

No man, however indifferent experience may have rendered him, can view the wealth of Goldfield without enthusing said Samuel C. Adams of Denver on his return from that most romarkable camp yesterday morning. At a corresponding period of development it overwhelms, he added, anything in the chronology of Cripple Creek, the production of which the first year of its caused old not exceed \$25.00, while Goldfield has marketed ores of the value of more than \$1,000.00 since January 1 list, with an amount exceeding this in gold dollars pited upon the surface. With the record at the Combination, the January and Jumbo, Mr. Adams was astonished. Through these properties he was shown with John A. Kirby, who will arrive from the West lomorrow, after an exhaustive exhamination of several proporties that were recently commended to him and his nessently of the great of his nessently commended to him and his nessently nessently the factorial him, will leave for Denver today and will in all probability return to the great camp of gold next month, although he has not decided definitely the factor of any of several propositions that have been presented to him. No man, however indifferent experience

TO SHIP SOON.

Forwarding of Ores From Buckhorn

to Clark Concentrator. Over at the Buckhorn group in Ophic canyon the management is rushing work on its new equipment. The ore bins are rapidly approaching completion as are the new indooratory and camp offices, while Manager Levy felt yesterday that he would be able to begin the active forwarding of milling ores to the Clark concentrator, with which the company has contracted early next month. Measwhile the machine drills are working night and day on general development, with some ore coming to the surface, while everything indicates that the Buckhorn will have soon begun to reproduce the history of early days. A great deal of work has been done since the reclamation of the cld producer was undertaken and with the facilities afforded by the arrangement with the Clark concentrator for the reduction of its orea its operation should soon become quite profitable. It is said of the milling over that there are enough exposed at this time with which to operate the mill at its maximum, while occurring with them is not a small amount of first-class that will come direct to market. canyon the management is rushing work

WASHING WITHOUT WATER.

Is Like Trying to Get Rid of Dandruff

Without Herpicide. Did you ever see any one trying to wash themselves without soap or water? If you did what would you say of him? It is every bit as foolish to try to get rid of Dandruff and to prevent Baldness by feeding the germs which cause it, with Canthurides, Vaseline, Glycerine and similar substances which form the principal ingredients of most so-called Hair Vigore.

THE TRIBUNE NEWS STANDS Very Rich Rock in Scottish Chief

the Properties Out of Park

City.

In the properties of the Scottish Chief Mining company out of Park City has just metallic contents of which, according to certificate from the assayer, consist of 744 ounces silver, with \$9.60 gold, 3 per cent lead, with a unit of coppercent lead, with a unit of copper. With which to verify these returns is a sample of ore at the general offices of the company in this city. A more pronounced example of chloride of silver has rarely been seen by local mining men, and local interests in the company were correspondingly exuitant. The channel from which it came and from which the new strike is reported was uncovered on the 259-foot level. For eighteen months, said Diavid B. Hempstead one of the officials of the company, during the afternoon, it had been ignored, the quartz over which the cirtracks passed disclosing little more than mineralization. On his return to camp recently Manager Lawrence decided to put a shot into it. The result was almost bewildering and since that the sacking of ore has been in progress, with a consignwildering and since that the sacking of ore has been in progress, with a consignment of the high-grade rock to follow in a few days. Above the chlorides, said Mr. Hempstead, was a streak of lead ore, the beat results to be had from which were indifferent, and it was this, perhaps, that misled the management. It is the intention now, said he, to sink on the chlorides and as soon as the dip of the channel shall have been determined, to crosscut to it from the 560-foot level. The company has been most persevering in its efforts to develop a mine on Scottish Chief ground, and mining circles generally will rejoice with the management over the present condition up there.

CLINGS TO OLD LOVE.

Cannot Be Induced to Part With the Old Camp of Gold.

A letter from George C. Fetterman, who has for many years divided his attention and taient between mining and commercial pursuits at De Lamar, Nev., says that while others are sceking new dig-gings, the old camp of gold never af-forced better evidence of permanency and that under the direction of Frank P. Swindler the mill and mines of Bamber-ger's De Lamar company are giving most excellent account of themselves. While the actual production of the mines nor the output of the mill is accurately known at camp it is generally conceded known at camp it is generally conceded that the latter will exceed \$2000 a day at this time, with every this time, with every assurance that it will pile into greater heights as the year

will plie into greater neights as the year advances.

Mr Fetterman has recently emphasized his confidence in the future of the camp by purchasing the H. W. Miles interest in what has been known since patriarchal days as the Miles company and has reincorporated it as the De Lamar Mercantile company, Mr. Fetterman, who acquires 25 per cent of R. assuming the presidency and general management with H. W. Miles as vice-president and W. D. Pase as secretary and treasurer. In addition to this he has just launched the Callente Mercantile company, with a caption to this he has just launched the aliente Mercantile company, with a capal stock of \$15.000 divided into shares of the par value of \$1 each, and over which e will preside, with F R McNamee as ice-president and W B Pase as secreary and treasurer As a home for the titer he is now constructing a large stone utilding at Callente, where he will be eady to receive his friends and make the armal opening about December 15. Meanme he is prosecuting development on formal opening about December 15. Meantime he is prosecuting development on
new mining properties that promise to ennich him and upon which it is not unlikely a
mill will be erected next season. With
the country surrounding Callente and the
mineral-bearing resources of a region that
extends for many miles beyond Mr. Fetterman is very much impressed. With
copper and gold, and silver and lead occurring in ledges large and small he has
no doubt that it will become one of the
most productive of the San Pedro railway s resources.

Bulls Control Copper Market.

Special to The Tribune

BOSTON, Mass., Oct. 28.—This has been about the biggest day that we have had in the copper share and the buil market appears to be on in force. Manipulation was for higher prices and commission-houses were in evidence with plenty of orders. There was at times plenty of profit taking and the market continued to advance notwithstanding the sales. The demand for these shares is increasing each day, and we are undoubtedly going to see a phenomenal market here unless all signs fall. Speculation is becoming broader each day and confidence is not tacking even in some of the issues that were considered almost valueless a few months ago. Today's market closed very netive and strong. Hernblower & Weeks, brokers & State street, Boston, and is Wall street, New York, furnish the following quotations: Special to The Tribune

EFFECT OF ELECTION ON COPPER Opinion of Noted Authority on the Copper Market.

John Stanton is quoted as saying: "The Copper Producers' association developed the fact that normally the increase of copper production in the United States is 19 per cent annually. This was about the rate in 1902, but 1903 did not show such a

large increase, nor will 1964.
"It seems to me the fact is overlooked "It seems to me the fact is overlooked or underestimated that it takes from two to three months to deliver copper from the time it leaves the mine. At the Lake two months is about the average. For exemple, we have not as yet managed to get all our August copper smelled in the West the time is longer, as the copper is treated electrolytically and this process consumes approximately three months. My theory is that we must always have a stock on hand (meaning by this at the smelters, in transit and in consumers hands equivolent to nearly one-fourth of the annual output of our mines.

"At the beginning of the year the stocks were a little over the necessary supply, probably 15,000 tons surplus, but this has now been eaten into and today we are sailing pretty close to the wind. The metal exchange's estimate of 79,000 tons, making 85,000 tons. American stocks, Probably 70,000 is our minimum mark for stocks, below which we cannot go and we are pretty near that mark now.

"Early in the year things were bad. Steel was down and general business had elackened up. With it the domaind for copied."

copper to china and will probably continue to do so.

"Our consumers have used the surplus up. The business outflook is rosy. Betting odds indicate an easy Republican victory, but the bug-bear of the election is holding business back to some extent. After the election we shall see the American consumer rushing for copper and the producers are holding off.

"After November, should Roosevelt be elected President, we shall see 14 cents for Lake copper. If Parker is elected, business will halt, but not go to the bad and the halt will not fast long. I expect no great scarcity of copper, but it will be scarce enough to call for higher prices."

BALAKLALA IN RICH ORE.

News of Strike Reached Local Offices Yesterday-Manager Snyder Back.

Western Exploration company yesterday afternoon of a rich strike in the company's property in Shasta county, California This mine, known as the Balaklala, adjoins the Mammoth mine, recently acquired by the United States Mining and

Smelting company.

A telegram from the superintendent of the mine contained the information that at a distance of 110 feet from the upraise in the main working tunnel, a big body of high-grade copper ore has been uncovered.

high-grade copper ore has been uncovered.

This large ore body was located some time ago by means of a diamond drill, and the management at once started the upraise which has uncovered the ore. General Manager W. F. Snyder returned last evening from an Eastern trip taken in the interest of the company. Mr. Snyder, while away, looked into the matter of securing equipment for a smelter which the company meditates building near the California property. He said last night that he had received several propositions looking toward the furnishing of this equipment, but that the company had come to no decision on the matter as yet.

TO LIGHT THE STOCKTON.

Contract Signed for Electric Light Plant-Will Start Soon.

Superintendent Galliger of the Stockton Gold Mining company has closed a contract for an electric lighting plant, to be tract for an electric lighting plant, to be used in lighting the mine and mill. Ninety lights will be installed. The generator will also assist in driving the mill machinery. Mr. Morgin, an experienced mill man, who thoroughly understands the ores of the Stockton district, has been engaged to manage the mill, which will probably start operations about November 15.

Boston & Terrace to Ship.

Boston & Terrace to Snip.

The Boston & Terrace Copper Mining company, with property on the west side of the Great Sait lake, is making traffic arrangements with the Southern Pacific company whereby the latter will begin to accept ores for shipment to the smelters. Sinking is in progress on the vein encountered in the main turned workings some time ago. The winze is down twenty-five feet and will be extended to lifty feet, where a station will be made and crosscuts started.

Rumored Strike on West Quincy.

A rumor was in circulation on the street yesterday to the effect that a strike of some importance had been made on the West Quincy property of the J. I. C. Mining and Milling company, General Mannager G. D. B. Turner of the company, accompanied by G. W. Topilif, went out to the property yesterday morning.

Mining Notes.

Walter James, who is developing the properties of the Black Rock Mining ompany in Beaver county, is up from the opported again, conferring with local

James Hendricks, superintendent of the ower Mammoth, came in from that Tin-ic property yesterday morning to con-uit with Manager Sydney Bamberger. Fred Flinds, the expert millman, leaves for Denver today, where with George I. Mosts manager of the Latham Mining company, be will place orders for machinery with which the company's properties at Spruce Mountain, Nev., are to be equipped.

be equipped

J. M. Reynolds, manager of the Wasatch King company's properties in Reaver county, left for comp last night to take the measurements of a new strike lown there. Samples of ore from the disclosure indicate the presence of a very high percentage of copper, while it is not millicity that a shipment will follow in a short time. The outlook is characterized as quite assuring.

A latter from Manager Corplan of the

A letter from Manager Cornish of the locks-Nevada assures fount interests that he is now sacking ore which affords as much as it her cot lead forty ounces silver and fillo gold, with "plenty of it" in the shaft, which has now reached a death of a little more than sixty feet. Of this class of ore ne reports a carload row at the surface. Manager Cornish, as are the shareholders to whom his report was forwarded, is very much alease. port was forwarded, is very much ple with conditions at camp.

with conditions at camp.

Twenty cars of ore were received from the various camps at the Taylor & Brunton sampler yesterday. Bingham reported with eight, Majestic with two, Tintic with four and Tonopah with six cars.

The City Bock mine at Alta made its first shipment in some time yesterday, when a carload of good ore reached the market.

Description United to the Control of the care of

President Butler of the Ozokerite Mining company left yesterday for a visit to the mines. He will return this evening.

Receipts at the Pioneer sampler consisted of one Cottonwood, two Alta and three Tintic.

Got Gold Ores at Great Depth

Important Development Rewards the Management of Bamberger's De Lamar Mines.

Perhaps the most significant demon-stration that has been made in Bamberger's De Lamar mines since their acquisition by the present company is that the main gold-bearing channel has been upon a horizon over 1000 feet below the crest of the great gold-bearing zone. Of perintendent of the properties, who is up from camp, made the announcement yesterday, and with the demonstration he feels that the management may rely on its resources for great depth. Nor is the lesson on longevity any more gratifying than are the metallic contents of the ore at a depth of over 1600 feet, and white Superintendent Swindler says they will wary from \$12 to \$20 per ton, there are bunches of ore in the mass that show a the county courthouse, in the court-room of said court, in Salt Lake City, Salt Lake county, Utah.

Witness the Clerk of said court, with the seal thereof a farked, this 25th day of October A D, 1904.

JOHN JAMES, Clerk. this Frank P. Swindler, the general suvary from #12 to \$50 per ton, there are bunches of ore in the mass that show a valuation exceeding \$100 gold per ton. Dismissing the new disclosure and considering conditions as a whole. Mr. Swindler says that at no time within a year have they been as assuring, and that concerning the future of Bamberger's De Lamar mines there is no shadow of doubt. At present he is drawing on the ore bodies for an average of \$50 tons of gold-bearing rock daily, and that October will show an increased output of gold bullion he is well satisfied.

satisfied.

He announces the appointment of Arthur R. Parsons, a Salt Lake boy, as assistant superintendent of the plant and properties, a selection that will clicit the cordial indersement of a large circle of

friends in this city.

Of the country penetrated by the San Pedro railway Mr. Swindler says there is no doubt that it is going to be productive of much ore, as it is being intelligently prospected, with not a few bona ilde finds to the credit of the present senson. He will depart for camp again next week to rush work on the new disclosure at great death and to prepare for another consign. depth and to prepare for another coment of gold buillon.

Ore and Bullion.

Ore and builion settlements, as reported for yesterday by McCornick & Co., amounted to \$87,700 as follows: Buillon, 6.360; gold bars, \$12,600; silver, gold, lead and copper ores, \$37,700. In the metallic market silver declined or 13% cents an ounce, copper was quoted at 12% cents a pound, and lead \$1500\$4.20 per

WILL MEET IN PORTLAND.

Trans-Mississippi Congress Goes to the Oregon Town. ST. LOUIS, Oct. 28.-The principal busi-

ness before the Trans-Mississipippi cogress today was a discussion of resoltions. Thirty recommendations embracng many subjects have been presented. Thorans Richardson of Portland, Or, chairman of the executive committee, recommended that the salaries of United States Congressmen be increased from 1900 to 18,000 a year.

The resolution of B. F. Thurber of New York asks that Congress place its disapproval upon strikes, pickeling, boycotting, union labels and similar devices of organized labor. ing, union labels and similar devices of organized labor. Portland, Or., was selected as the place or the next meeting of the congress.
